RISE's RA-140 Super Sporting Trigger (SST) for ARs has been a popular choice for many customers and now it's even better than ever as the Rave 140.

Extreme reliability through enhanced engineering. No take-up — just a smooth, crisp break and a short Quik-Klik™ reset you can feel. Elementary installation — no set screws to tighten. Sleek appearance to accompany the enhanced performance. Available with curved or flat trigger blade. Single stage, 3.5-lb. pull weight. The ideal cost-conscious upgrade. Includes free anti-walk pins for worry-free. Installation. Melonite-coated interior parts for enhanced strength and corrosion resistance. Contained in an anodized housing machined from a solid block of 6061 aluminum, which is more durable and longer lasting than punch-tin housings to help the trigger perform flawlessly under a variety of conditions. Compatible with AR-style platforms with mil-spec dimensions — including .223/5.56, .308, 6.5, and 9mm calibers. Backed by the RISE More-Bang-for-Your-Buck Performance Guarantee and Lifetime Warranty. The Breek Arms WARHAMMER MOD2 ambi charging handle is a simple and affordable upgrade that will substantially increase the use of your AR-15. Easily grab on either side of the handle and you can quickly charge your rifle even with large gloves with the textured grooves that are cut into the latch handles. The wide set-back latches work great for large optics. The low profile design keeps it slim and sleek looking without sacrificing functionality. Made entirely out of 7075 aluminum for added strength and durability! The new MOD2 design features improvements for further reducing gas blowback in the shooter's face. The relief cuts on the top and bottom of the stem are designed to help direct extra gas out the side and away from your face. And for any gas that does manage to go straight back, we increased the height of the shelf to better cover the back of the upper. These modifications help improve the shooting experience, especially when shooting suppressed!
