

SLIDE BUILD KITS FOR GLOCK 17® - BROWNELLS SLIDE BUILD KIT FOR GLOCK 17 NON-THREADED BARREL

[Handgun Parts](#) > [Slide Parts](#) > [Slides](#)

The perfect set to build your own Glock 17~. Choose from the Brownells threaded on non-threaded barrels as well as a standard slide or a windowed slide. All sets come with an RMR Cut Slide, Barrel, RMR Plate, Sights, and a Parts Kit to finish out the slide for your build! The limited production Brownells Brown RMR Slide for Glock® 17 Gen3 pistols features a pre-cut slot for easy, secure, low-profile mounting of a Trijicon RMR or Holosun red dot sight. Up front, there are distinctive, cocking serrations that aid in manipulating the slide to check the chamber or clear a jam. And we'll admit it: the serrations just look cool, too. All RMR Slides also have standard Glock® factory front and rear sight dovetails for "iron" sights. To get proper co-witnessing with the RMR, you will need to also install suppressor-height iron sights. These limited production Brownells Brown slides for the Glock® 17 Gen3 come with a "window" cutout on top between the front serrations that enhances airflow to keep the barrel cooler - ideal for hard-working action competition pistols. Plus, if you have an upgraded barrel with a contrasting finish or a unique exterior pattern (fluting, spirals, "flames," etc.) the window lets you show it off a bit! A Brownells RMR Slide is the ideal upgrade for your factory Glock® 17 Gen3 OR the perfect "top half" for a brand-new custom gun built on a Polymer80 80% frame. Fits Gen3 Glock® 17 pistols & clones Built-in Trijicon RMR mounting slot Also accepts Holosun HE508T, HS507C & HS407C red dot sights Factory front/rear iron sight cuts, too Machined from corrosion-resistant 17-4 stainless steel billet Each RMR Slide for Glock® starts life as a billet of 17-4 stainless steel that is machined to Glock® factory specifications inside, so it'll accept factory or aftermarket barrels and internal parts. Each slide is heat-treated to Rc 41-44 on the Rockwell C scale for added surface hardness and wear resistance. The Brownells Brown slide is a limited production and once they are gone, they're gone. Brownells Gun Tech™ Note: Channel liner required for these slides. Channel liner is a press fit and requires a tool to install. We recommend #777-100-017. Includes patented optic cut technology pioneered by ZEV Technologies. Patent No. RE47335 Our Match-Grade Barrel for the Glock® 17 fits ALL generations of G17, Gen1 through Gen5. It's an excellent replacement for a shot-out factory barrel or for completing a pistol based on the G17 platform. And it's the ideal tube for a custom gun built on a Polymer80 frame with a Brownells RMR Slide on top! Each Brownells Match-Grade Barrel for Glock® 17 is machined from hardened 416R stainless steel to precise dimensions, so it's a drop-in fit on most guns. The tight lockup helps ensure superb accuracy, too. The extra-hard Black Nitride finish resists surface wear and stops in its tracks whatever corrosion might try to challenge the stainless steel. This 9mm Luger (9x17mm) chambered barrel is button-rifled with standard, 1-10" right-hand, 6-groove rifling that is compatible with "practice" ammo with non-jacketed bullets. Fits Glock® 17 Gen1 thru Gen5 Button-rifled 1-10" twist 416R stainless steel Non-reflective Black Nitride anti-corrosion finish Threaded model available with 1/2"-28 tpi threads Our match barrel for Glock® 17 is available with either a Plain muzzle with an 11-degree target crown or Threaded (1/2"-28 tpi) to enable installation of a compensator or sound suppressor. Both are laser-engraved with the chambering and the Glock model it fits.

Attributes

- Name: [BROWNELLS SLIDE BUILD KIT FOR GLOCK 17 NON-THREADED BARREL](#)

Safety Instruction Guide for SLIDE BUILD KITS FOR GLOCK 17®

Introduction

Thank you for choosing the SLIDE BUILD KITS FOR GLOCK 17® from Brownells. This guide provides important safety information, installation instructions, and usage guidelines to ensure the safe and effective use of your product. Please read this guide carefully before use.

General Safety Guidelines

- Ensure that all components of the SLIDE BUILD KIT are compatible with your Glock 17® model.
- Always handle firearms and their components with care. Treat every firearm as if it is loaded.
- Keep firearms out of reach of children and unauthorized users.
- Always wear appropriate safety gear, including eye protection, when working with firearms.
- Be aware of your surroundings and ensure that you are in a safe environment when using your firearm.
- Regularly inspect your firearm and its components for signs of wear or damage.
- If you notice any unusual behavior or performance issues, cease use immediately and consult a qualified gunsmith.

Specific Safety Precautions for Use

- Only use factory or approved aftermarket parts that are compatible with your Glock 17®.
- Ensure that the firearm is unloaded before performing any installation or maintenance.
- Follow all local laws and regulations regarding firearm modifications and usage.
- When installing the SLIDE BUILD KIT, ensure that all parts are securely fitted and properly aligned.
- Avoid using excessive force during installation to prevent damage to components.
- Be cautious when using red dot sights and ensure they are securely mounted to avoid detachment during use.
- If using suppressorheight sights, ensure they are compatible with the RMR Slide to maintain proper cowitnessing.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary tools and components for the installation of your SLIDE BUILD KIT.
- Ensure your workspace is clean and welllit.

2. Installation Steps:

- Confirm that your Glock 17® is unloaded and safe to work on.
- Remove the factory slide and barrel from your Glock 17®.
- Install the Brownells RMR Slide onto the frame, ensuring it is properly aligned.
- Insert the barrel into the slide, ensuring a secure fit.
- Attach the RMR Plate and secure it according to the manufacturer's instructions.
- Install your chosen sights, ensuring they are aligned and secure.
- If using a threaded barrel, ensure that any attachments (e.g., compensators or suppressors) are properly installed.

3. Testing:

- After installation, perform a function check to ensure that all components operate smoothly.

- Test fire your firearm in a controlled environment to ensure proper operation.

Disposal Instructions

- Dispose of any packaging materials responsibly and in accordance with local regulations.
- If you need to dispose of any firearm components, consult local laws to ensure compliance with regulations regarding hazardous materials and firearms.

Contact Information for Further Support

For any inquiries regarding safety, installation, or usage of your SLIDE BUILD KIT, please consult the manufacturer or a qualified gunsmith.

Conclusion

By following this safety instruction guide, you can ensure the safe and effective use of your SLIDE BUILD KIT FOR GLOCK 17®. Always prioritize safety and consult professionals when in doubt. Thank you for your commitment to responsible firearm ownership.
