[Handgun Parts](#) > [Frame Parts](#) > [Frames](#)

When Lone Wolf first launched the original Timberwolf frame, one of the first questions was “when will it be available in 9mm, .40 S&W, and .357SIG?” That time is now, because they’ve revamped and upgraded the design to bring you the Timberwolf Compact. The first thing you’ll notice is that the TWC fits in your hand like a much smaller pistol. The TWC-3 and TWC-1 accept Gen3 and Gen4 G19, 23, 32, and 38 slides. When using a Gen4 slide you simply remove the installed adapter in the dust cover area of the frame. Using Gen3 slides you leave the adapter in place to fill the gap between the slide and dust cover. The TWC includes the dust cover adapter, removable magazine well, and interchangeable backstraps. No matter what your shooting goal is, the TWC will fit your needs. Whether you want a gun for backwoods carry, a longslide for competition, a slim and easy to carry 9mm for personal protection, or just want to build the coolest gun at the range, the Timberwolf Compact can make your dreams come true. Assembled frames come with the following parts installed. If purchasing a bare frame with parts kit the same parts are used but not installed, if you are using your own parts please note most parts are GEN3 parts except the magazine catch, locking block (PN 4361), and trigger housing which requires a GEN4 style part.
