The upper includes a DUSK19 profile slide made of 17-4SS and finished in either an attractive black nitride or a selection of great PVD options such as flat dark earth, oil rubbed bronze, or graphite gray. Front and rear serrations on the slide provide ease of chambering and press-check. The slide is reflex sight-ready with the DUSK19 optic cover plate included, which is compatible with both Trijicon RMR/SRO and Holosun 407/507/508 (Non-K Models) footprints. Additionally, this slide includes a ? co-witness Night Fision Stealth Series sight with a Tritium insert for clear sight vision from DUSK to dawn. The upper also includes a 416 stainless-steel PVD coated barrel with the DUSK 19 profile and is available in either threaded or non-threaded. The hood pocket and lateral ribs reduce bearing surface for faster cycling and coating wear resistance. The CCS frame features a 19° grip angle for improved point ability and interchangeable flat & rounded backstraps to allow the shooter the most comfortable choice of grip. The integrated take-down frame scallops for ease of function as well as integrated grip panels with a textured grip for an ergonomic, stable grip. The grip includes an integrated, flared magwell with a grip textured toe kick and an enlarged trigger guard to prevent "Glock knuckle".
