

# CHAMBER TYPE BULLET SEATER DIES - L.E. WILSON 6MM GT BULLET SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

The Wilson chamber type bullet seater is a favorite among benchrest shooters. A chamber type bullet seater positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional 7/8 inch to 14 bullet seating die. This is one of the most accurate bullet seaters ever made!

## Attributes

- Name: [L.E. WILSON 6MM GT BULLET SEATING DIE](#)

# **Safety Instruction Guide for CHAMBER TYPE BULLET SEATER DIES L.E. WILSON 6MM GT BULLET SEATING DIE**

## **Introduction**

Thank you for choosing the L.E. Wilson Chamber Type Bullet Seater Die. This product is designed for precision bullet seating in the reloading process, particularly favored by benchrest shooters. This guide provides essential safety instructions and best practices to ensure safe and effective use of the product, in compliance with the EU General Product Safety Regulation (GPSR).

## **General Safety Guidelines**

- Ensure that you are familiar with the reloading process and the specific requirements for using this bullet seating die.
- Always follow the manufacturer's instructions and guidelines for safe handling and use.
- Keep the product out of reach of children and vulnerable individuals.
- Regularly check for any product recalls or safety alerts on the EU Safety Gate platform.
- Report any unsafe conditions or incidents to relevant authorities.

## **Specific Safety Precautions for Use**

- Always wear appropriate safety gear, including safety glasses and gloves, when working with reloading equipment.
- Ensure that your workspace is clean, dry, and welllit to prevent accidents.
- Inspect the bullet seating die for any damage before use. Do not use if damaged.
- Avoid using excessive force when seating bullets; this can lead to misalignment or damage to the die.
- Store the bullet seating die in a secure location when not in use to prevent accidental injury.
- Be aware of the specific cartridge type (6 GT) for which this die is designed and do not attempt to use it with incompatible cartridges.

## **Instructions for Installation and Usage**

### **1. Installation:**

- Ensure that your reloading press is securely mounted and stable.
- Insert the bullet seating die into the press according to the manufacturer's instructions.
- Tighten the die securely, ensuring it is aligned properly for optimal performance.

### **2. Usage:**

- Prepare your cartridge case and bullet according to standard reloading procedures.
- Place the cartridge case into the die, ensuring it is fully seated.
- Insert the bullet into the case mouth, ensuring it is aligned with the seating stem.
- Slowly and evenly apply pressure to the press handle to seat the bullet into the cartridge case.
- Inspect the seated bullet for proper alignment and depth before removing the cartridge from the die.

## **Disposal Instructions**

- Dispose of any unused or damaged product components following local regulations for hazardous materials.

- Do not dispose of the die in regular household waste. Instead, check with local authorities for proper disposal methods.

## Contact Information for Further Support

For any safety inquiries or further assistance, please refer to the manufacturer's contact information provided with the product packaging or visit the manufacturer's official website.

By adhering to these safety guidelines and instructions, you can ensure a safe and successful reloading experience with the L.E. Wilson Chamber Type Bullet Seater Die. Thank you for your commitment to safety and precision in your reloading activities.
