

# CHAMBER TYPE BULLET SEATER DIES - L.E. WILSON 22 CREEDMOOR BULLET SEATING DIE

[Reloading](#) > [Reloading Dies](#) > [Rifle Dies](#)

L.E. WILSON, INC. CHAMBER TYPE BULLET SEATER DIES The Wilson chamber type bullet seater is a favorite among benchrest shooters. A chamber type bullet seater positively controls both bullet and cartridge case alignment. The case and bullet are completely captured by the die prior to the bullet being pushed straight into the case by a close-fitting seating stem. This style of bullet seater works more accurately than a conventional 7/8 inch to 14 bullet seating die. This is one of the most accurate bullet seaters ever made! SPECS & FEATURES Contents: Seater die, seater base, allen wrench, instructions in a card board box. All stainless steel construction for strength and longevity Chamber-type capture: case and bullet aligned before seating Close-fitting seating stem seats bullets straight to the case mouth Depth adjustment via cap screw (3/8"-24 TPI) for precise control More accurate than conventional 7/8"-14 TPI seaters Benchrest-proven performance with low runout results Made in the USA.

# Safety Instruction Guide for CHAMBER TYPE BULLET SEATER DIES L.E. WILSON 22 CREEDMOOR BULLET SEATING DIE

## Introduction

Thank you for choosing the L.E. WILSON Chamber Type Bullet Seater Die. This product is designed with precision and safety in mind for benchrest shooters. To ensure safe and effective use, please read and follow these safety instructions carefully.

## General Safety Guidelines

- Always handle the die and related components with care.
- Ensure the workspace is clean, dry, and free from distractions.
- Use protective eyewear when operating the bullet seater to prevent injury from any debris.
- Keep out of reach of children and vulnerable individuals.
- Regularly inspect the die for any signs of wear or damage before use.
- If you encounter any issues, do not attempt to repair the die yourself. Seek professional assistance.

## Specific Safety Precautions for Use

- Before using the die, read the instructions thoroughly to understand its operation.
- Ensure that the bullet and cartridge case are compatible with the die specifications.
- Do not force the bullet into the case; ensure proper alignment before seating.
- Maintain a safe distance from others while operating the die to avoid accidents.
- Never leave the die unattended while in use.
- Always store the die in a secure location when not in use.

## Instructions for Installation and Usage

### 1. Installation:

- Securely mount the bullet seater die in your reloading press according to the manufacturer's instructions.
- Ensure that the die is tightened properly to avoid movement during operation.

### 2. Preparation:

- Gather all necessary components: bullet, cartridge case, and the bullet seater die.
- Inspect the bullet and cartridge case for any defects or damage.

### 3. Seating Process:

- Insert the cartridge case into the die and ensure it is correctly positioned.
- Place the bullet on top of the cartridge case.
- Adjust the seating stem if necessary to ensure a close fit.
- Gradually pull the handle of the reloading press to seat the bullet into the case. Ensure smooth operation without forcing.

### 4. PostUse:

- After use, clean the die to remove any debris or residue.

- Store the die and components in a safe and dry location.

## **Disposal Instructions**

- Dispose of any damaged or worn components according to local regulations.
- Do not throw away the die in regular household waste. Check for recycling options specific to metal and machinery components.

## **Contact Information for Further Support**

For further support or inquiries regarding safety, please refer to the product packaging or the manufacturer's website for contact details.

By following these safety instructions, you can help ensure a safe and effective experience with the L.E. WILSON Chamber Type Bullet Seater Die. Always prioritize safety and remain informed about proper usage practices. Thank you for your attention to these guidelines.
