

WILSON CASE GAGE - L.E. WILSON 33 XC CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

L.E. WILSON CASE GAGES The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECS Contents: Gage & instructions a cardboard box. OAL: 2.494" ID: Large end: .473". small end: .347" OD: .991" Color: Silver with knurling in the middle.

WILSON CASE GAGE L.E. WILSON 33 XC CASE GAGE Safety Instructions

Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 33 XC CASE GAGE. This guide provides essential safety information and instructions for the proper use of this product. Please read and follow all instructions carefully to ensure safe and effective operation.

General Safety Guidelines

- Ensure that the gage is used only for its intended purpose.
- Always inspect the gage for damage or wear before use. Do not use if damaged.
- Keep the gage out of reach of children and vulnerable individuals.
- Use personal protective equipment (PPE) as needed, such as safety glasses.
- Do not modify the gage in any way.
- Ensure that your workspace is clean and free of obstructions.
- Be aware of your surroundings and ensure that no one is in close proximity while using the gage.
- Follow all local regulations regarding the handling and disposal of materials.

Specific Safety Precautions for Use

- Always refer to the manufacturer's instructions when using the gage.
- Do not exceed the recommended specifications for the cartridge being measured.
- Use a caliper to measure headspace accurately. Incorrect measurements can lead to unsafe reloading practices.
- Avoid using excessive force when inserting or removing cases from the gage.
- Be cautious of sharp edges on the gage; handle it with care to avoid injury.
- If you experience any difficulties during use, stop immediately and consult the instructions or seek assistance.

Instructions for Installation and Usage

1. Preparation:

- Ensure your workspace is clean and organized.
- Gather all necessary tools, including the gage and a caliper.

2. Using the Gage:

- For Regular Style:
 - Insert the cartridge case into the gage.
 - Check the overall length to determine if trimming is necessary.
 - Measure the datum to head length to confirm correct headspace.
- For Adjustable Style:
 - Adjust the gage as needed for belted magnum cases.
 - Ensure the belt supports proper headspace during measurement.

3. PostUse:

- Clean the gage after each use to remove any debris or residue.
- Store the gage in its cardboard box to protect it from damage.

Disposal Instructions

- Dispose of the gage in accordance with local regulations.
- If the gage is damaged or no longer usable, consider recycling materials where possible.
- Do not dispose of the gage in household waste unless permitted by local laws.

Contact Information for Further Support

For any questions or concerns regarding the WILSON CASE GAGE L.E. WILSON 33 XC CASE GAGE, please contact the manufacturer or refer to the product packaging for additional information.

Please keep this guide for future reference and ensure that all users of the WILSON CASE GAGE are familiar with these safety instructions.
