

WILSON CASE GAGE - L.E. WILSON 7RSAUM CASE GAGE

[Reloading](#) > [Measuring Tools](#) > [Case Gauges & Headspace Tools](#)

L.E. WILSON CASE GAGES The most important use of a cartridge case gage is for setting up 7/8"-14 press type full length resizing dies. A common error in reloading is to oversize your brass. Headspace of fired cases can quickly and accurately be measured using this tool and a caliper. Regular Style: This one piece gage will check overall length to indicate a need for trimming and datum to head length to assure correct headspace to prevent over sizing. Adjustable Style: For belted mags. While the belt provides support for proper headspace, the life of the case will drastically shorten unless resizing is held to a minimum at the shoulder. SPECS Contents: Gage & instructions a cardboard box. OAL: 2.494" ID: Large end: .473". small end: .347" OD: .991" Color: Silver with knurling in the middle.

WILSON CASE GAGE Safety Instruction Guide

Introduction

Thank you for choosing the WILSON CASE GAGE L.E. WILSON 7RSAUM CASE GAGE. This guide provides essential safety instructions to ensure the safe and effective use of this product. Please read this document carefully before use to understand the necessary precautions and procedures.

General Safety Guidelines

- Ensure that the WILSON CASE GAGE is used only for its intended purpose, which is measuring cartridge case headspace and overall length.
- Always handle the gage with care to avoid damage to the tool and ensure accurate measurements.
- Keep the gage out of reach of children and vulnerable individuals to prevent accidents.
- Regularly inspect the gage for any signs of wear or damage before use. If any defects are found, discontinue use immediately.
- Always follow the manufacturer's instructions when using the gage to avoid injury or improper measurements.
- Report any unsafe products or accidents to the relevant authorities.

Specific Safety Precautions for Use

- Before using the gage, ensure that your work area is clean and free of obstructions.
- When measuring cases, use a caliper to ensure that measurements are accurate.
- Avoid applying excessive force when inserting cases into the gage to prevent damage to both the gage and the cases.
- Do not use the gage for any purpose other than measuring cartridge cases.
- Be cautious of sharp edges on the gage and handle it with care to avoid cuts or injuries.

Instructions for Installation and Usage

1. Preparation:

- Ensure that you have a clean and welllit workspace.
- Gather all necessary tools, including the WILSON CASE GAGE and a caliper.

2. Using the Gage:

- **For Regular Style:** Insert the cartridge case into the large end of the gage. Check the overall length to determine if trimming is necessary. Measure the datum to head length to confirm correct headspace.
- **For Adjustable Style:** Insert the belted mag case into the gage. Ensure that the belt is properly seated for accurate measurements. Avoid resizing at the shoulder to prolong the life of the case.

3. PostUse:

- After use, clean the gage to remove any debris or residue.
- Store the gage in its cardboard box to protect it from damage.

Disposal Instructions

- Dispose of the WILSON CASE GAGE in accordance with local regulations.
- If the gage is no longer functional or safe to use, consider recycling materials where applicable.
- Do not dispose of the gage in regular household waste.

Contact Information for Further Support

For any questions or concerns about the WILSON CASE GAGE, please reach out to the designated contact point for product safety inquiries in your region. Ensure to keep this guide for future reference.

Thank you for prioritizing safety and responsible use of the WILSON CASE GAGE.
