

SINCLAIR LOADING BLOCK (25 ROUNDS) - SINCLAIR INTERNATIONAL POLY LOADING BLOCK, 25 ROUND, 308 FAMILY

[Reloading](#) > [Case Preparation](#) > [Loading Blocks](#)

These 25 round blocks are half-size blocks that are excellent for small batches of cases. These blocks are also commonly used on the shooting bench to hold loaded rounds or fired cases. blocks are machined from solid white polyethylene providing the reloader with a very durable, easy to clean loading block. Each block is machined to fit the specific cases you reload and has finger grooves machined into the sides to provide a sure grip. Each hole has a slight chamfer for easy case head entry. The "Poly" blocks are dishwasher safe for easy cleaning. We use white polyethylene because spilled powder shows up easily. These blocks are 3/4" thick to provide deeper holes for your cases to sit in, great for short to medium length cartridges. 749-000-742 only has 16 round capacity due to case head diameter.

Sinclair loading block (25 round), 17 Rem/222 Rem/223 Rem

SINCLAIR LOADING BLOCK (25 ROUNDS) SAFETY INSTRUCTION GUIDE

Introduction

Thank you for choosing the Sinclair Loading Block (25 Rounds) from Sinclair International. This guide provides essential safety instructions and guidelines to ensure the safe and effective use of your loading block. Please read this document carefully to understand how to use this product safely.

General Safety Guidelines

- Ensure that the loading block is used in a safe environment, free from distractions and hazards.
- Always handle ammunition with care and follow standard safety protocols when reloading.
- Store your loading block in a cool, dry place, away from direct sunlight and moisture.
- Regularly inspect the loading block for any signs of wear or damage before use.
- Keep the loading block out of reach of children and vulnerable individuals.

Specific Safety Precautions for Use

- Always verify that the loading block is compatible with the ammunition you are using (e.g., 223 Remington, 204 Ruger).
- Do not exceed the recommended capacity of 25 rounds in the loading block.
- Avoid placing the loading block on unstable surfaces to prevent accidental spills.
- Ensure that the loading block is clean and free of debris before use.
- Use appropriate personal protective equipment (PPE), such as safety glasses and gloves, when handling ammunition.

Instructions for Installation and Usage

1. Preparation:

- Make sure you have a clean work area and all necessary tools and materials ready.
- Check that your loading block is free of any obstructions or damage.

2. Loading the Block:

- Hold the loading block securely in one hand.
- Carefully insert each round into the designated slots, ensuring that they are seated properly.
- Do not force rounds into the loading block if they do not fit easily.

3. Using the Loaded Block:

- Once loaded, transport the loading block carefully to your shooting location.
- Avoid dropping or jarring the loading block to prevent damage to the ammunition.

4. Unloading the Block:

- When unloading, do so in a safe area, away from any potential hazards.
- Remove rounds one at a time, ensuring that you do not mix different types of ammunition.

Disposal Instructions

- Dispose of any damaged or worn loading blocks in accordance with local regulations.

- Do not throw away the loading block in regular household waste.
- Contact local waste management authorities for proper disposal methods.

Contact Information for Further Support

For any inquiries regarding the safety and use of the Sinclair Loading Block, please refer to the appropriate EUbased contact point or customer service resources available through the retailer where the product was purchased.

Conclusion

By following these safety instructions and guidelines, you can ensure a safe and effective experience with your Sinclair Loading Block. Always prioritize safety and be mindful of the handling of ammunition. Thank you for choosing our product, and we wish you a safe and enjoyable experience.
