

FLASH HOLE DEBURRING TOOLS - RCBS FLASH HOLE DEBURRING TOOL W/6MM PILOT

[Reloading](#) > [Case Preparation](#) > [Flash Hole Deburring Tools](#)

Burrs left on the inside of the flash hole during manufacturing can cause erratic ignition. This handy tool automatically locates the hole and quickly removes the burr. A self-centering pilot collar with an adjustable stop allows quick alignment and prevents the removal of too much brass.

FLASH HOLE DEBURRING TOOL Safety Instructions

Introduction

Thank you for choosing the RCBS Flash Hole Deburring Tool with 6mm Pilot. This tool is designed to enhance the performance of your reloading process by removing burrs from the inside of flash holes, ensuring consistent ignition. To ensure your safety and the proper use of this product, please read the following safety instructions carefully.

General Safety Guidelines

- Always use the tool in a wellventilated area.
- Keep the tool out of reach of children and pets.
- Inspect the tool before use for any signs of damage or wear.
- Do not use the tool for any purpose other than its intended use.
- Wear appropriate personal protective equipment (PPE), such as safety glasses and gloves, when using the tool.
- If you experience any discomfort or notice any unusual behavior from the tool during use, stop immediately and inspect it.

Specific Safety Precautions for Use

- Ensure that the tool is securely attached to your work surface before use.
- Avoid applying excessive force while deburring to prevent damage to the tool or the brass.
- Always keep your hands and other body parts clear of the cutting area.
- Be cautious of sharp edges and burrs that may result from the deburring process.
- Store the tool in a safe place when not in use to prevent accidental injury.

Instructions for Installation and Usage

1. Preparation:

- Gather all necessary materials, including the RCBS Flash Hole Deburring Tool and the brass cases you will be working on.
- Ensure your work area is clean and organized.

2. Installation:

- Attach the selfcentering pilot collar to the tool.
- Adjust the stop to the desired depth to prevent the removal of too much brass.

3. Usage:

- Position the tool over the flash hole of the brass case.
- Apply gentle downward pressure to allow the pilot collar to selfcenter and locate the hole.
- Rotate the tool clockwise to begin the deburring process.
- Continue to rotate until you feel the burr has been removed.
- Carefully lift the tool away from the brass case and inspect the flash hole for a smooth finish.

4. PostUse:

- Clean the tool after each use to maintain its effectiveness.

- Store the tool in a dry, safe location away from children and pets.

Disposal Instructions

- Dispose of any brass shavings and burrs in accordance with local waste management regulations.
- Do not dispose of the tool in regular household waste. Check with your local recycling program for proper disposal methods for metal tools.

Contact Information for Further Support

For any questions or concerns regarding the use of the RCBS Flash Hole Deburring Tool, please refer to the manufacturer's website or customer service resources. It is important to have access to support for any safety inquiries or product issues.

Thank you for following these safety instructions. Your adherence to these guidelines will help ensure a safe and effective experience with your RCBS Flash Hole Deburring Tool.
