

MATCH GRADE BUSHING - .258" DIAMETER MATCH BUSHING

[Reloading](#) > [Reloading Dies](#) > [Neck Size Bushings](#)

The Hornady match Grade Dies feature interchangeable neck sizing bushings that are self centering. The bushings allow the user to size the case neck to the bullet tension you desire. This eliminates the chance of over-sizing your case necks and overworking the brass. Bushings are available in .002 inch increments. The Match Grade Full Length Die will size the case body, bump the shoulder and size the case neck with the selected bushing. The Match Grade Neck Die sizes the neck with the installed bushing and bumps the shoulder only (no body sizing). Both versions feature a self centering decap spindle with an o-ring spindle tensioner, and the elliptical expander ball with headed decap pin - the same pin used in the Custom Grade Dies. These bushing sizer dies have some unique features and are very well made and finished.

Attributes

- Name: [.258" DIAMETER MATCH BUSHING](#)
- Manufacturer: [HORNADY](#)
- Product no.: 749016856
- Mfr. No.: 594258

MATCH GRADE BUSHING Safety Instruction Guide

Introduction

Thank you for choosing the MATCH GRADE BUSHING .258" DIAMETER MATCH BUSHING by Hornady. This product is designed to enhance your reloading experience by providing precise neck sizing for your cases. To ensure safe and effective use, please read this safety instruction guide carefully.

General Safety Guidelines

- Always follow the manufacturer's instructions for use and maintenance.
- Keep the product out of reach of children and pets.
- Inspect the bushing regularly for wear or damage before use.
- Use appropriate personal protective equipment (PPE) such as safety glasses and gloves when handling reloading equipment.
- In case of an emergency or unsafe situation, stop using the product immediately and seek assistance.

Specific Safety Precautions for Use

- Ensure that the bushing is compatible with your reloading die before installation.
- Avoid overtightening the bushing as this can lead to damage or malfunction.
- Do not exceed the recommended sizing increments to prevent overworking the brass.
- Always maintain a clean working environment to avoid contamination of the bushing and other components.
- Be aware of the risk of pinching or injury when handling the bushing and decap spindle.

Instructions for Installation and Usage

1. Installation of the Bushing:

- Ensure the reloading die is securely mounted in your reloading press.
- Remove the existing bushing if necessary by unscrewing it from the die.
- Select the appropriate .258" diameter bushing for your needs.
- Screw the new bushing into the die until it is snug, but do not overtighten.

2. Using the Match Grade Full Length Die:

- Insert the case into the die.
- Pull the press handle to size the case body, bump the shoulder, and size the case neck with the selected bushing.
- Check the case dimensions to ensure proper sizing.

3. Using the Match Grade Neck Die:

- Insert the case into the neck die.
- Pull the press handle to size the neck with the installed bushing and bump the shoulder only.
- Verify the neck tension and adjust as necessary.

4. PostUse Care:

- Clean the bushing and die after each use to remove any debris or residue.
- Store the bushing in a dry, cool place to prevent corrosion.

Disposal Instructions

- Dispose of any worn or damaged bushings according to local regulations for metal recycling.
- Do not dispose of the bushing in regular household waste. Check with local authorities for proper disposal methods.

Contact Information for Further Support

For any questions or concerns regarding the MATCH GRADE BUSHING, please reach out to the manufacturer or authorized dealer for assistance. They will provide you with the necessary support regarding safety inquiries and product usage.

Thank you for following these safety instructions. Your adherence to these guidelines will help ensure a safe and enjoyable reloading experience with your MATCH GRADE BUSHING.
