## Extended Magazine Release:

The MK IV 22/45 Magazine Release protrudes further from the frame than the original. This allows for faster and more comfortable magazine ejection.

The release works with the factory magazines. However, since the magazine sits higher, it is highly recommended to use the magazine release in conjunction with our Magazine Base Pads.

Please note: when using our release with factory magazines and base pads, that the magazine will sit just above flush on the bottom of the frame.

## Basepad:

Magazine Base Pads for the MK IV 22/45 make inserting and removing magazines faster and easier - for lightning fast reloads. CNC machined from billet aluminum. Magazines can be changed with ease.

These pads work with factory magazines and also convert any Ruger MKIII magazine to a Ruger MK IV 22/45 magazine.
