Kestrel General RH Calibration Kit Safety Instructions

Introduction

Thank you for choosing the Kestrel General RH Calibration Kit for your Kestrel 3000, 3500, or 4000 Series meter. This guide provides essential safety instructions to ensure the safe and effective use of the calibration kit. By following these guidelines, you can maintain the accuracy of your Kestrel meter while adhering to the EU General Product Safety Regulation (GPSR).

General Safety Guidelines

- Ensure that the calibration kit is used only for the intended purpose as specified in the manual.
- Keep the calibration kit out of reach of children and vulnerable individuals.
- Regularly inspect the calibration kit for any signs of damage or wear.
- Always operate the calibration kit in accordance with the provided instructions.
- If you encounter any issues or suspect that the product may be defective, cease use immediately and consult the appropriate support resources.
- Report any unsafe products or accidents to the relevant authorities.

Specific Safety Precautions for Use

- **Hazard Identification:**
 - The calibration kit contains small parts that may pose a choking hazard if ingested.
 - Improper handling of the calibration kit may lead to inaccurate measurements, which can affect the performance of your Kestrel meter.
- **Avoiding Hazards:**
 - Always handle the calibration kit with clean, dry hands to prevent contamination.
 - Do not expose the calibration kit to extreme temperatures or moisture, as this may damage the components.
 - Follow all instructions carefully to avoid errors during the calibration process.
- **Age Specific Warnings:**
 - This product is not intended for use by children without adult supervision.
 - Ensure that any individuals using the calibration kit are informed of the proper handling and safety measures.

Instructions for Installation and Usage

1. **Preparation:**
 - Read the included manual thoroughly before beginning the calibration process.
 - Gather all necessary tools and materials as outlined in the manual.
2. **Setup:**
 - Find a clean, dry workspace free from distractions.
 - Ensure that your Kestrel meter is turned off before beginning the calibration.
3. **Calibration Process:**
 - Follow the stepbystep instructions provided in the manual for recalibrating your Kestrel meter.
 - Allow approximately 50 hours for the entire setup and calibration process.
 - Monitor the calibration process closely and make adjustments as needed based on the manual's guidance.
4. **PostCalibration:**
 - After completing the calibration, verify the accuracy of your Kestrel meter.
 - Store the calibration kit in a safe place when not in use.

Disposal Instructions

- Dispose of the calibration kit in accordance with local regulations regarding electronic waste.
- Do not throw the calibration kit in regular household waste.
- If you are unsure how to dispose of the product, contact your local waste management authority for guidance.

Contact Information for Further Support

For any questions or concerns regarding the Kestrel General RH Calibration Kit, please refer to the contact information provided in the manual. Ensure you have the product details ready when seeking assistance.

Thank you for your attention to these safety instructions. By following these guidelines, you can ensure the safe and effective use of your Kestrel General RH Calibration Kit.
